SECOM-D-074

6 April 1984

MEMORANDUM FOR: Members, DCI Security Committee  
Interim Chairman and Members,  
Personnel Security Subcommittee

FROM: Chairman, SECOM

SUBJECT: Behavioral Science/Personnel Security Symposium

1. The DCI Security Committee plans to hold a symposium on Behavioral Science and Personnel Security at CIA Headquarters on 28 and 29 June 1984. The objectives of the symposium are to examine ways that behavioral science might contribute to more effective personnel security programs, review ongoing work and existing literature on the subject, and identify promising areas for further study. The symposium format will provide the opportunity for the exchange of ideas and information between behavioral scientists and personnel security officers of the Intelligence Community.

2. In addition to seeking speakers on personnel security reliability, we are also attempting to compile a bibliography and identify audiovisual materials relating to the subject. Please provide any information you may have on either subject promptly to the SECOM staff.

3. Members of the Security Committee and the Personnel Security Subcommittee are expected to participate in the symposium. The senior personnel security adjudication officers in each member agency should also be invited. Others who might benefit from attendance or contribute to the program are those who deal with problem cases, and personnel, medical or psychological specialists who participate in the personnel security process. In order to keep attendance at a level which will permit a reasonable exchange between speakers and audience, quotas for member agencies may be necessary. Even though the CIA auditorium seats 500, an audience of more than 100 would probably make meaningful dialogue difficult. Please advise me of your agency's needs for spaces not later than 27 April 1984. A Top Secret clearance based on a background investigation will be required for attendees.

~~FOR OFFICIAL USE ONLY~~

**FOR OFFICIAL USE ONLY**

4. Attached is a proposed agenda for the symposium. Your comments or suggestions would be appreciated no later than 16 April 1984, in order to proceed with arrangements for speakers. Those members who have nominated the speakers identified on the draft agenda will be requested to make arrangements for their nominees to participate in the symposium.

5. We plan to videotape each session to extend the utility of the Symposium. Please ask if your speakers have any objection to this. We will provide speakers an opportunity to edit their material.
